

Job Search and Networking Platform

Project Features List

Features of the Project

1.Login or Registration

If the employee has already registered, they can log in directly; otherwise, they create an account with their name, email, ID, password, and mobile number.

2.Creation of Profile:

After login, employees can create their profile by editing personal details, uploading the resume, and setting job preferences.

3.Job Search Section

Employees need to enter the employee number, select the category of their job, and specify a location in order to narrow down their search.

4.Category Exploration:

Users can see the positions that are open in categories related to their skill set matching, including but not limited to: Marketing, Customer Service, Human Resources.

5.Available Jobs Section

This is the section containing newly updated and available job listings. Each of the jobs listed includes a title, location, and options to "Apply Now" so further action may be taken.

6.Subscription to jobs

Employees can subscribe to job-making companies for news on new job listings and opportunities

Company examples like – MAS Holdings,Hemas,Jone Keells Holdings.

7.Notification Section

Employees who have selected or applied for a job will receive notification with important updates including interview schedules and other relevant details.
